

ANGLAIS BACCALAUREAT SERIE C,D,E, TI-SESSION 2024

(ANSWER ALL THE QUESTIONS)

SECTION A: GRAMMAR

I. Complete the following conversation on volunteering with the correct words chosen from those in the brackets.

Fidelis: Hi, Erin. You look busy these days. I hardly see you.

Erin: Hello, Fidelis. You are right. Since I started offering free computer classes, I have been pretty busy.

Fidelis: How did you get (on, into, in) volunteering?

Erin: Well, I was bored doing nothing (2) (for, since, during) last year holidays, so I organised free computer classes for adults in my community.

Fidelis: How do you feel about volunteering?

Erin: It's very challenging helping old people to use digital technology (3) (but, because, although) they think they are too old to learn. It's tiring but very interesting.

Fidelis: I see... Have you (4). (benefits, benefit, benefitted) from volunteering?

Erin: Sure! It has helped me improve my communication skills and I have gained a lot of teaching experience as well. I have also learnt to be (5) (patients, patient, patience)

Fidelis: Wow! It's worth experiencing. I'll try it someday. See you guy!

Erin: Why not join me, Fidelis?

II. Rewrite the sentences beginning with the phrases or Words given to you. Do not change the meaning of the preceding sentence.

1. I pass my Baccalaureat exam. I go abroad to further my studies. If I passed

2. Many young people are using smartphones to communicate nowadays. Smartphones

3. "I will visit my childhood friends in Foubot next year", Ayuk said. Ayuk said

4. I woke up late this morning. I watched the opening ceremony of the World Cup in Qatar last night I watched.

5. There are bank security measures. Criminals still succeed in stealing money. Despite.

SECTION B: VOCABULARY

I. Fill in the blanks with the correct word chosen from those in the brackets.

1. It is difficult to eat these days. Everything is expensive. We don't when foodstuffs inflation will stop in Cameroon. Nothing is easy. (know, now, no)

2. Before getting a job now, you have to undergo anor two. If you do well, they can offer you the post but there are so many applicants for the same post. (demand, interview, entertainment)
3. During my spare time. I like television or listening to music. Many girls prefer browsing their computers or reading messages. (watching, seeing, regarding)
4. That's not true. Remember that gender is not good.
Why don't you just refer to all the youths? (difference, discrimination, distinguishing)
5. Don't take it too seriously. I need to smile so as to forget my worries. We have gone for three months now without salaries. Our.has not paid us a single franc. (employee, employer, patron) p

II. Complete the following cloze text with the correct answer chosen from the list below. There are more words than you will need.

give up, card, bills, waiter, situation, delicious, mood, call, ketchup, application, job, money

After my Baccalaureat, I decided to go abroad to further my education and find a good job that will enable me help my family back home. Unfortunately, I couldn't do so because the embassy did not respond to the visa (1)that I dropped there. This (2) stressed me up for a long time. One day, my friend Richard took me out in order to change my (3) end help me relate We went to a Wonderful restaurant with (4) local and western dishes. The (5) served me Fufu and Eru while my friend ordered fried chicken and chips with mayonnaise and (6) When we had finished enjoying ourselves, Richard did not have enough cash to pay for the (7) so he had to use his credit (8) W to settle the cost. On our way back home, I received a phone (9). from the embassy telling me that I had been approved. A month later, I travelled to America. I can actually attest that whatever difficulties we face in life, we should never (10)

SECTION C: READING COMPREHENSION

Read the passage carefully and then answer the questions below in complete English sentences. Use your own words as far as possible.

Cameroon is experiencing a great awareness of many researchers who invest in the domain of health. Many of them are throwing more light on some diseases through the discovery of appropriate medication or equipment that helps the society in general to treat them and avoid unpredictable and negative consequences. Arthur Zang, a young Cameroonian aged 24, invented a device called the Cardio pad. The Cardio pad is a touch screen medical tablet that enables heart examinations to be performed. The results of the tests are sent wirelessly to specialists in other parts of Cameroon who can interpret them. The Cameroon Scientific Committee has recognised the Cardio pad as extremely effective. The device costs about \$4000. The government of Cameroon has not yet been able to provide it to local hospitals in need, as it was initially meant to serve. in rural areas; due to the fact that most of those hospitals lack internet and enough electricity.

As the Covid-19 pandemic continues to ravage the world's health care system and disrupts socio-economic activities, intensive efforts in the developed countries to find a vaccine yielded fruits. Cameroon, like other African countries, did not fold its arms and wait. The search for new remedies with traditional herbs proved effective in curbing the spread of the virus. Today, the country boasts of four traditional herbs which accompany the population in curbing or preventing the deadly pandemic.

The good news was made known on July 8, 2021, when the Minister of Public Health, officially authorised the local marketing of four improved traditional medicines to fight against Covid- 19 for a period of three years. These are: Adsak Covid/ Elixir Covid, produced by the archbishop of Douala, Mgr Samuel Kleda, Corocur Powder, by the cardiologist, Euloge Yagnigni, Soudicov Plus, by Imam Modibo Soudi, and the “Ngul Be Tara” kit for Covid-19 treatment by Dr Peyou Ndi Samba. In his decision, Malachie Manaouda specifies that the four approved improved traditional medicines are “adjuvants to the treatment of Covid-19” in Cameroon. That is, they must be associated with the existing anti-Covid-19 protocol. An administrator of the Ministry of Public Health, indicated that these traditional medicines were recognised independently by a national drug commission in collaboration with the Ministry of Scientific Research and that of Higher Education. Naturopathic practitioners, who developed and presented these traditional herbs, rejoiced seeing their research works endorsed by the government. But the happiest in all was the population as it benefited from the herbs at a time everybody feared dying if affected with the Coronavirus. Millions of Cameroonians have attested the goodness of the different traditional herbs to cure Covid-19 and the testimonies continue.

(Culled from Cameroon Tribune)

QUESTIONS

Who is Arthur ZANG and what is Cardio pad’?

Has the Cameroonian government been able to provide the cardio pad to local hospitals? Why’?

3- Name two medications and their inventors that accompany the population in curbing or preventing the Covid-19 pandemic.

4- Say whether the following statements are **true (T) or false (F)**

a) Covid-19 has not disrupted socio-economic activities

b) Cameroonians and Africans folded their arms and waited for solutions.

5- Are those traditional herbs efficient? How do you know?

6- As a science student, what would you like to achieve in the medical field, in future? Why?

SECTION D: COMPOSITION WRITING

Write a composition of between 250 -- 300 words on ONE of the following topics:

1- There have been power cuts in your neighbourhood. Sometimes you go for weeks without electricity. This situation is affecting your studies and your family life negatively. Write a letter of complaint to the Manager of AES SONEL about the power cuts and how they are affecting you. In your letter: talk about the frequency of these cuts, the consequences on you, your family and the community as a whole. Your name is Togi and your address is G.H.S. Warda, P.O. Box 2222, Gari Gombo. .

2- Farmers of your village have more and more difficulties in carrying out their activities as days go by. The seasons keep on changing and the rainy seasons during which they used to plant their seeds have become unpredictable. The situation affects the whole chain of food production. Write an essay on the causes, consequences of climate change, and provide some solutions to prevent it in the society.

3- There is an outbreak of cholera currently going on in your area, Wawa In. As the president of the Health Committee, you have been selected to sensitise the people on how to prevent cholera. Write a

speech in which you describe the mode of transmission of cholera, its symptoms and how it could be prevented.

CORRIGE EREUVE D'ANGLAIS BACCALAUREAT C,D,E,TI-SESSION 2024

SECTION A: GRAMMAR

I. Complete the following conversation on volunteering with the correct words chosen from those in the brackets.

- 1) into
- 2) during
- 3) because
- 4) benefitted
- 5) patient.

I. Rewrite the sentences beginning with the phrases or Words given to you. Do not change the meaning of the preceding sentence

1. If I passed my Baccalaureat exam, I would go abroad to further my studies.
2. Smartphones are being used by many young people to communicate nowadays.
3. Ayuk said that he would visit his childhood friends in Foumbot next year.
4. I watched the opening ceremony of the World Cup in Qatar last night, so I woke up late this morning.
5. Despite the bank security measures, criminals still succeed in stealing money.

SECTION B: VOCABULARY

I. Fill in the blanks with the correct word chosen from those in the brackets

1. It is difficult to eat these days. Everything is expensive. We don't know when foodstuffs inflation will stop in Cameroon. Nothing is easy.
2. Before getting a job now, you have to undergo an interview or two. If you do well, they can offer you the post, but there are so many applicants for the same post.
3. During my spare time, I like watching television or listening to music. Many girls prefer browsing their computers or reading messages.
4. That's not true. Remember that gender discrimination is not good. Why don't you just refer to all the youths?
5. Don't take it too seriously. I need to smile so as to forget my worries. We have gone for three months now without salaries. Our employer has not paid us a single franc.

II. Complete the following cloze text with the correct answer chosen from the list below. There are more words than you will need.

- (1) application
- (2) situation
- (3) mood

- (4) delicious
- (5) waiter
- (6) ketchup.
- (7) bills,
- (8) card
- (9) call
- (10) give up.

SECTION C: READING COMPREHENSION

Read the passage carefully and then answer the questions below in complete English sentences. Use your own words as far as possible.

1. Arthur Zang is a young Cameroonian inventor, aged 24, who created a device called the Cardio pad. The Cardio pad is a touch screen medical tablet designed to perform heart examinations, with test results sent wirelessly to specialists in other parts of Cameroon for interpretation.

2. No, the Cameroonian government has not been able to provide the Cardio pad to local hospitals. This is because many of these hospitals, especially in rural areas, lack the necessary internet access and sufficient electricity needed to support the device. **(1 mark)**

3. Two medications that accompany the population in curbing or preventing the Covid-19 pandemic in Cameroon are:

- **Adsak Covid/Elixir Covid - invented by Archbishop Samuel Kleda of Douala.**
- **Corocur Powder - invented by cardiologist Euloge Yagnigni.**

4. Say whether the following statements are true (T) or false (F)

- **a) False (F)** - Covid-19 has disrupted socio-economic activities.
- **b) False (F)** - Cameroonians and Africans did not fold their arms; they actively sought solutions, including the development of traditional remedies to combat the virus.

5. Yes,

The traditional herbs are considered efficient. This is evident because millions of Cameroonians have attested to their effectiveness in curing Covid-19, and the government officially authorized the local marketing of four improved traditional medicines to fight against the virus. The continued positive testimonies from the population further support their efficiency.

6. As a science student aspiring to contribute to the medical field, I have several goals

- **Research and Innovation:** I want to engage in cutting-edge research and contribute to medical advancements. Whether it's developing new treatments, understanding disease mechanisms, or improving diagnostics, I'm passionate about pushing the boundaries of knowledge.
- **Patient Care:** I aim to directly impact patients' lives. Whether as a physician, nurse, or allied health professional, I want to provide compassionate care, alleviate suffering, and improve health outcomes.
- **Global Health:** I'm drawn to addressing health disparities worldwide. I want to work in underserved communities, tackle infectious diseases, and promote preventive measures to enhance overall well-being.
- **Health Education:** Educating people about health and disease prevention is crucial. I'd like to contribute by teaching, writing, or creating accessible health resources.
- **Ethical Practice:** Upholding ethical standards is paramount. I want to advocate for patient rights, informed consent, and evidence-based medicine.

Ultimately, my goal is to make a positive impact, combining scientific knowledge with empathy and compassion.

SECTION D: COMPOSITION WRITING

Write a composition of between 250 - 300 words on ONE of the following topics:

1.

G.H.S. Warda, P.O. Box 2222,

Gari Gombo

Date: August 19, 2024

Manager, AES SONEL

Gari Gombo Office

Dear Sir/Madam,

I am writing to express my deep concern regarding the frequent power cuts in our neighborhood. For the past few months, we have been experiencing severe disruptions to our electricity supply, often going for weeks without power. This ongoing issue is severely impacting both my studies and my family life.

The frequency of these power cuts has become increasingly problematic. On average, we face power outages several times a week, and at times, the electricity is unavailable for up to two days consecutively. This erratic supply has made it challenging to keep up with my academic responsibilities.

As a student, consistent access to electricity is crucial for studying, completing assignments, and accessing educational resources online. The lack of power has resulted in missed deadlines and hindered my academic performance.

Additionally, these power cuts have caused significant disruptions to my family life. Our household appliances, including the refrigerator and cooking equipment, are rendered useless during outages. This situation has led to spoiled food, difficulty in preparing meals, and increased expenses as we have to buy perishable items more frequently. The lack of power also affects our ability to stay informed through media and maintain proper communication.

The broader community is similarly affected. Local businesses struggle to operate, and essential services are interrupted, causing inconvenience and economic losses.

I kindly request that AES SONEL address this issue urgently. Reliable electricity is vital for our daily lives, and a prompt resolution would greatly alleviate the challenges we are currently facing.

Thank you for your attention to this matter.

Yours sincerely,

Togi

2.

Climate Change: Causes, Consequences, and Solutions

Climate change is a pressing global issue that affects every aspect of our lives. From extreme weather events to disruptions in food production, its consequences are far-reaching. In this essay, we'll explore the causes of climate change, its impact on agriculture, and practical solutions to mitigate its effects.

Causes of Climate Change

1. Greenhouse Gas Emissions: Fossil fuels—coal, oil, and gas—are major contributors to climate change. They release greenhouse gases (GHGs) into the atmosphere, trapping heat and causing global

warming. Deforestation also reduces the Earth's capacity to absorb carbon dioxide.

2. Industrial Activities: Manufacturing, transportation, and energy production release significant GHGs. Deforestation for urbanization and agriculture exacerbates the problem.

Consequences of Climate Change

1. Agriculture Disruptions:

- **Unpredictable Seasons:** Changing weather patterns disrupt planting and harvesting cycles. Rainy seasons are no longer reliable, affecting farmers' ability to sow seeds.
- **Crop Failures:** Extreme temperatures, droughts, and floods harm crops. Reduced yields threaten food security.
- **Livestock Challenges:** Heat stress affects livestock health, productivity, and reproduction.

2. Economic Impact:

- **Loss of Livelihoods:** Farmers face income losses due to crop failures. Rural communities suffer.
- **Increased Food Prices:** Reduced agricultural output leads to higher food prices, affecting consumers globally.

3. Environmental Consequences:

- **Biodiversity Loss:** Habitats change, endangering plant and animal species.
- **Sea Level Rise:** Melting glaciers and ice sheets contribute to rising sea levels, threatening coastal communities.

Solutions to Prevent Climate Change

1. Individual Actions:

- **Reduce Energy Consumption:** Use energy-efficient appliances, switch to LED bulbs, and limit heating and cooling use².
- **Promote Sustainable Transport:** Walk, cycle, or use public transport to reduce emissions from personal vehicles.

2. Political Advocacy:

- **Lobby for Change:** Pressure local politicians and businesses to support emission reduction efforts. Attend meetings and voice concerns³.
- **Support Climate Policies:** Advocate for policies that promote clean energy, carbon pricing, and conservation.

3. Transition to Renewable Energy:

- **Invest in Solar and Wind:** Transition from fossil fuels to renewable energy sources.
- **Promote Green Technologies:** Encourage research and development of clean energy solutions.

4. Afforestation and Reforestation:

- **Plant Trees:** Forests absorb CO₂ and help regulate the climate.
- **Restore Degraded Land:** Revive ecosystems to enhance carbon sequestration.

5. Education and Awareness:

- **Spread Knowledge:** Educate communities about climate change and its impact.
- **Inspire Action:** Encourage collective efforts to reduce emissions.

Climate change affects us all, but we can make a difference. By understanding its causes, addressing its consequences, and implementing practical solutions, we can create a sustainable future for generations to come. Let us act now to protect our planet

3.

Speech on Cholera Prevention

Ladies and Gentlemen,

Good [morning/afternoon/evening],

As the president of the Health Committee, I stand before you today to address a critical issue that is affecting our community—an outbreak of cholera. It is essential for us to come together and understand how to protect ourselves and our loved ones from this dangerous disease.

Mode of Transmission

Cholera is primarily transmitted through contaminated water and food. The bacteria that cause cholera, *Vibrio cholerae*, are often present in water sources that have been polluted by fecal matter. This contamination can occur due to inadequate sanitation and hygiene practices. Consuming food or water that has been in contact with such contaminants is the most common way for cholera to spread.

Symptoms

Recognizing the symptoms of cholera is crucial for early detection and treatment. The most common symptoms include:

Severe diarrhea, which may be watery and resemble “rice water.”

Vomiting, which often accompanies diarrhea.

Rapid dehydration, leading to symptoms like dry mouth, excessive thirst, dark-colored urine, and dizziness.

In severe cases, cholera can cause shock and even be life-threatening if not treated promptly.

If you or someone you know exhibits these symptoms, it is vital to seek medical attention immediately.

Prevention Measures

Preventing cholera is largely about ensuring good hygiene and sanitation. Here are some essential steps we should all follow:

Safe Drinking Water: Ensure that all water you consume is clean. Boil water before drinking or use water purification tablets. Avoid drinking untreated water from unreliable sources.

Proper Food Handling: Wash fruits and vegetables thoroughly with clean water before eating. Cook food thoroughly and avoid consuming raw or undercooked foods.

Hand Hygiene: Regularly wash your hands with soap and clean water, especially before eating and after using the toilet. Proper handwashing helps prevent the spread of bacteria.

Sanitation: Maintain proper sanitation in your living environment. Ensure that waste is disposed of properly and that toilets are kept clean and functional.

Education and Awareness: Educate yourself and others about cholera and its prevention. Share this information with friends, family, and neighbors to ensure everyone is aware of the risks and preventive measures.

By following these preventive measures, we can protect ourselves and our community from cholera. Let us work together to maintain good hygiene, ensure safe water and food practices, and promote awareness. If we each do our part, we can overcome this outbreak and safeguard our health.

Thank you for your attention and cooperation.

Stay safe and healthy.
